Esteban Primost

I'm Esteban, a Computer Systems Engineer with 15+ years of experience building and scaling software products. In recent years, I've worked as a Senior JavaScript Engineer and Team Lead, specializing in Node.js and React, and collaborating closely with product, design, and engineering teams.

I'm particularly interested in **Product Engineer**, **Founding Engineer**, or **Full Stack Engineer** roles, where I can take ownership across the stack and contribute to shaping products from early ideas to real-world impact.

Let's build great products.

Work & Projects

A summary of my most recent roles, projects, and the technologies I've worked with.

geut

2018 – Present

geut is a geek-driven tech lab where I work across multiple projects, wearing different hats depending on the stage and needs of each product. My role spans from hands-on engineering to technical leadership, with a strong focus on building real, usable products.

Some of the products we've been building:

- Sher

  Decentralized live audio streaming platform.

- Tuqui

  Gift platform built for the Latin American market. **Actively evolving**

- Permanent Seeder

  High-performance super seeder for hyperdrives. **Open source**.

Alliants

2023 – 2025

I contributed to the development of a platform for creating surveys focused on young students. I worked across the stack, moving between **backend engineering** and **frontend development** depending on the needs of the product and the team.

In the final phase, I led and executed **technical and UX audits** aimed at improving overall **user experience, performance, and maintainability**. This work helped **reduce friction in key user flows**, improve platform responsiveness, and surface structural improvements that had a measurable impact on the quality and stability of the product. The outcomes —both in terms of impact and learning— were highly positive.

Serverless · AWS · Node.js · PostgreSQL · Nuxt · Vue.js · Tailwind CSS

Sher

2019 – 2023

A platform developed by GEUT for **live audio streaming**. In this project, we explored and embraced the decentralized ecosystem, building a product capable of competing with similar services while significantly **reducing infrastructure and maintenance costs**.

JavaScript · Node.js · PostgreSQL · GraphQL · React · Fastify · Apollo · Hypercore

Sinaptia / Mekanoid

2022 – 2023

I worked as **Team Lead and Full Stack JavaScript Developer** on the MVP of a **cybersecurity platform** focused on incident detection and automated contingency actions.

My role combined technical decision-making, hands-on development, and close collaboration with product and security teams.

JavaScript · Node.js · GraphQL · AWS · SST · React

Wireline / DXOS

2018 – 2020

Worked on the development of a **collaborative text editor** synchronized using **CRDTs**, as part of the DXOS ecosystem — a toolkit for building collaborative and decentralized applications.

JavaScript · Node.js · CRDT · Yjs · React

Ingenious

2017 – 2018

Participated as a developer in several projects, including:

- A **mobile application for telemedicine**

- A **real-time advertising platform** for public transportation

- An **online evaluation and decision-making system** for organizations

JavaScript · Node.js · .NET · Neo4j · React · React Native · WebRTC

Subsecretaria de Innovación y Experiencia Ciudadana

2016 – 2017

Worked on several government projects, including a **chatbot designed to assist citizens with administrative procedures**.

JavaScript · Node.js · PHP · React · Laravel

Language Trainers

2015 – 2016

Worked on platform improvements, feature updates, and long-term maintenance, including database migrations and system optimizations.

JavaScript · PHP · Laravel · MySQL

Unidad Ejecutora Provincial

2012 – 2014

Designed and developed platforms for managing provincial educational infrastructure projects, including ongoing feature development and maintenance.

JavaScript · PHP · Laravel · SQL Server

RPSolutions

2011 – 2014

Handled project coordination, Android application development, and system supervision, maintenance, and support.

Android · JavaScript · PHP · Laravel · Symfony · CodeIgniter

Universidad Católica de La Plata (UCALP)

2010 – 2011

Application development and maintenance for the university's IT department.

JavaScript · PHP · SQL Server

VMN+

2009 – 2010

Worked on multiple projects, including a platform focused on **construction technology visualization**.

OpenLaszlo · Adobe Flex · PHP

AM Soluciones

2009

Worked as a developer on several private projects.

PHP · Drupal

Universidad Nacional de La Plata (UNLP) — School of Informatics

2006 – 2007

Served as a **teaching assistant and ad honorem collaborator** for the Computer Programming course, supporting students during their first steps in software development.

Participations, Events, and Workshops

Below is a selection of key conferences, meetups, and collaborative events where I've participated, spoken, or contributed workshops.

- **Web3 Summit** — Berlin, Germany · August 2019

  International conference focused on decentralized technologies, cryptography, and Web3 ecosystems.

- **Data Terra Nemo** — Berlin, Germany · May 2019

  Experimental gathering exploring peer-to-peer systems, decentralization, and alternative network models.

- **NodeConf Argentina** — Buenos Aires, Argentina · October 2018

  Conference dedicated to the Node.js ecosystem, best practices, and real-world applications.

- **JSDay Uruguay** — Montevideo, Uruguay · November 2017

  JavaScript-focused conference covering frontend, backend, and emerging web technologies.

- **NodeConf Argentina** — Buenos Aires, Argentina · November 2016

  Participation in talks and workshops centered around Node.js and scalable JavaScript architectures.

- **LaPlataJS Meetups** — La Plata, Argentina · October 2016

  Talk and workshop: *Introduction to GraphQL* and first hands-on experience with the technology.
